TECHNICAL SKILLS

- **Programming Languages:** Python, R, Java, JavaScript, C++, SQL
- **Machine Learning:** Scikit-learn, XGBoost, Pandas, NumPy, Imbalanced-learn (SMOTE)
- **Data Visualization:** Matplotlib, Seaborn
- **Web Development:** React.js, Node.js, Express.js, HTML/CSS
- **Databases:** MongoDB
- **Tools:** Power BI, Google Colab, Git, GitHub, Figma, Agile Methodologies

PROFILE INFO

Data Science undergraduate at SLIIT with hands-on experience in machine learning, data preprocessing, and visualization. Skilled in Python, R, and full-stack development (MERN, .NET). Proven ability to transform data into actionable insights and develop scalable solutions. Strong problem-solving, teamwork, and communication skills with a passion for data-driven decision-making.

WORK EXPERIENCE

Data Analyst Intern

Control Union Inspections (Pvt) Ltd – Colombo

6-month internship (August 2025 – February 2026)

EDUCATION

B.SC. IN INFORMATION TECHNOLOGY (SPECIALIZED IN DATA SCIENCE)

SRI LANKA INSTITUTE OF INFORMATION TECHNOLOGY (SLIIT) | 2023 – PRESENT

DIPLOMA IN INFORMATION TECHNOLOGY (DISTINCTION)

ESOFT METRO COLLAGE
2022-2023

NOTABLE PROJECTS

Customer Churn Prediction

Tech: Machine Learning, Python, Scikit-learn, XGBoost, Pandas, Seaborn, Matplotlib

CERTIFICATION

- Introduction to Data Science – Simplilearn (July 2025)

SOFT SKILLS

- Problem-Solving | Team Collaboration | Stakeholder Communication
- UI/UX Design (Figma) | Project Management | Agile Methodologies
- Strong Work Ethic | Adaptability | Attention to Detail

REFERENCE

- M. C. N Manathunge
(Tech Lead)

- Nimesha Kalalpitiya
(Senior Project Manager)
Bio Foods (PVT) LTD
nishurk@gmail.com
TP: +94761888642

- Developed an end-to-end ML pipeline to predict telecom customer churn.
- Performed EDA, handled class imbalance with SMOTE, and optimized model performance.
- Achieved high accuracy using Decision Trees, Random Forest, and XGBoost.
- Deployed the model using Pickle and documented the project on GitHub.

Hospital Emergency Room Dashboard | Data Analytics Project

Tech: Power BI, DAX, SQL, Data Visualization

- Developed an interactive Power BI dashboard using anonymized ER data from a U.S. hospital.
- Tracked KPIs including patient volume, wait times, satisfaction scores, and admissions trends.
- Implemented dynamic filters (monthly/yearly views) and executive summaries for data-driven decision-making.
- Designed patient-level drill-downs to identify bottlenecks and improve care delivery efficiency.

Diabetes Prediction System | ML Project

Tech: Python, Scikit-learn, Pandas, NumPy

- Built an SVM-based classifier using the PIMA Diabetes dataset.
- Preprocessed data (scaling, splits) and achieved 78% accuracy in training data and 77% accuracy in test data.
- Designed a real-time prediction system for diabetes risk assessment.
